

Setting a Course Image

To make a course stand out on the Moodle home page, it is possible to upload an image for the course thumbnail. When viewing the Moodle Dashboard in the card or summary view, the image will be shown. If you don't set an image, Moodle picks a default abstract image. Learn more about the course overview listing on our [Moodle Dashboard help page](#).

Examples

The first course has a custom course image. The other courses have a default Moodle image.

Instructions

Go to your course and select "Edit settings" from the gear icon (top right).

Go to the "Description" section and upload your image to the "Course Image" section.

Save the updated setting and go to the [Moodle Dashboard](#) to see the results
