Extended time on Quizzes

It is possible to give specific students (or groups of students) a different time limit on quizzes. This is useful for students that need extended time. It is also possible to modify the quiz start and end dates in case students need an extension or provide an additional attempt for a quiz if a student needs a retake.

To make the change, enter the quiz, click on the Gear icon (top right) and select "User Overrides" or "Group Overrides". Adjust the settings as needed.
