Send Mail As a Mailing List or Alias

If you are on a departmental mailing list and have a need to send messages from that mailing list address in Gmail, you will want to set the address up as a "Send Mail As" account. (Note: These instructions assume both accounts are on the swarthmore.edu domain).

1. Open Settings from the gear menu. Choose the Accounts tab.

2. Click Add another email address you own. Enter a descriptive official name for the account and the email address. Keep Treat as an alias checked.

3. You will be asked to send a verification email. Click Send Verification.

4. The verification email will be sent to the list. Check your inbox for the email containing the confirmation code.

5. Enter the confirmation code on the confirmation window.
6. That is it! Now when you compose an email, you will have the option to change the "From" address to the alternate email address.

An email with a confirmation code was sent to help@swarthmore.edu. [Resend email]
To add your email address, do one of the following:

Click on the link in the confirmation email

OR

Enter and verify the confirmation code

Verify
